- .4 Such an instrument shall be executed, approved and recorded in a like manner as plats of subdivisions; and being duly recorded shall operate to annul the force and effect of the recording of the plat so vacated, and to divest all public rights in the streets and public grounds dedicated to the County as set forth on the final plat. If the County Board approves such vacation where the County had acquired an interest, by deed, in any property proposed to be dedicated to the County as set forth on the final plat, the County shall reconvey such interest, by deed, to the applicant, property owner or his or her successor in interest. *(Ordinance #89/July 1, 2008)*

6.01.08 RECORDING FINAL PLAT: Approval of the final plat by the County Board shall be null and void if the final plat is not recorded with the County Recorder within ninety (90) days after the date of approval, unless an extension is requested by the developer within that time and granted by the County Board. *(Ordinance #89/July 1, 2008)*

6.01.09 FAILURE TO CONSTRUCT REQUIRED IMPROVEMENTS: In the event a developer has posted a performance guarantee in lieu of actual construction of required improvements, the County Board may thirty (30) days prior to the expiration of the performance guarantee review the development of the subdivision and may direct the County Engineer to proceed to execute the performance guarantee in order to assure that the required improvements are completed. *(Ordinance #89/July 1, 2008)*

Chapter 7 DESIGN STANDARDS

7.01.00 CONFORMANCE TO APPLICABLE RULES AND REGULATIONS: No subdivision shall be approved and accepted by the County unless it conforms to the minimum requirements contained herein. In addition to these requirements, all subdivisions shall comply with the following: *(Ordinance #89/July 1, 2008)*

- .1 The County Zoning Ordinance and all other applicable laws, rules and regulations of the appropriate local jurisdictions. *(Ordinance #89/July 1, 2008)*
- .2 The Comprehensive Development Plan and all other applicable plans adopted by the County. *(Ordinance #89/July 1, 2008)*
- .3 All applicable standards established and regulations adopted by the County Engineer and all officers, departments and boards of the County. *(Ordinance #89/July 1, 2008)*
- .4 All applicable laws, rules and regulations of the State and its duly constituted agencies. *(Ordinance #89/July 1, 2008)*
- .5 Approval may be withheld if a subdivision is not in conformity with the above laws, rules and regulations, and the purposes of this Ordinance, as established in Section 1.01.01. *(Ordinance #89/July 1, 2008)*

7.01.01 LAND SUITABILITY: No land shall be subdivided which is found to be unsuitable for development by reason of flooding, ponding, poor drainage, adverse soil conditions, adverse geological formations, unsatisfactory topography or other features likely to be harmful to the health, safety or general welfare of the future residents of the subdivision or the residents of the County, until such time as

conditions causing the unsuitability are corrected. The following general standards shall apply: *(Ordinance #89/July 1, 2008)*

- .1 The County Board, may when it deems it necessary, for the health, safety or welfare of present or future residents of the area or necessary to the conservation of water, drainage and sanitary facilities, prohibit the subdivision of any portion of the property which lies within the one hundred (100) year flood plain of any river or stream, into individual lots. *(Ordinance #89/July 1, 2008)*
 - A. Residential subdivisions shall provide all lots with a means of vehicular access that will not be flooded during an occurrence of a one hundred (100) year flood. *(Ordinance #89/July 1, 2008)*
- .2 Whenever a subdivision is submitted for an area which is subject to ponding or poor drainage, the County Board may approve such subdivision provided the developer fills the affected area of the subdivision to an elevation sufficient to place the elevation of the streets and lots at a minimum of one (1) foot above the elevation of the maximum probable flooding, as determined by the developer's engineer, and approved by the County Engineer. Such subdivision shall provide for an overflow area along the bank of any stream or watercourse, in a width which shall be sufficient in times of high water to contain or move the water, and no fill shall be placed in the overflow area nor any structure be erected or placed therein. The boundaries of the overflow area shall be subject to the approval of the County Engineer. Development in areas of extreme ponding or poor drainage should be discouraged. *(Ordinance #89/July 1, 2008)*
- .3 The County Board, in applying the provisions of this Section, shall in writing, recite the particular facts upon which it bases its conclusion that the land is not suitable for the proposed use and afford the developer the opportunity to present evidence regarding such unsuitability if he so desires. Thereafter, the County Board may affirm, modify or withdraw its determination of unsuitability. *(Ordinance #89/July 1, 2008)*

7.01.02 **PRESERVATION OF NATURAL FEATURES:** Existing features which would add value to residential development or the County as a whole, such as large trees, unusual rock formations, watercourses, hilltops, scenic views, sites of historical significance and similar irreplaceable assets, shall be preserved in the design of the subdivision. *(Ordinance #89/July 1, 2008)*

7.01.03 **LOT DRAINAGE:** Lots shall be laid out so as to provide positive drainage away from all buildings and individual lot drainage shall be coordinated with the general storm drainage pattern of the area. Drainage shall be designed so as to avoid concentration of storm drainage water from each lot to adjacent lots. *(Ordinance #89/July 1, 2008)*

7.01.04 **WATERBODIES AND WATERCOURSES:** If the tract being subdivided contains a water body, or portion thereof, lot lines shall be drawn so as to distribute the entire ownership of the water body among the fees of adjacent lots. The County Board may approve an alternate plan whereby the ownership of and responsibility for the safe maintenance of the water body is so placed that it will not become a

County responsibility. None of the land which is under water shall be utilized to meet the minimum area of the lot required under the County Zoning Ordinance. Where a watercourse separates the buildable area of a lot from the street by which it has access, provisions shall be made for the installation of a culvert or other structure, in accordance with standards and specifications approved by the County Engineer. *(Ordinance #89/July 1, 2008)*

7.01.05 RESERVED.

7.01.06 LOTS: The arrangement of lots shall be such that there will be no foreseeable difficulties, for reasons of topography or other conditions, in securing zoning permits to build on all lots in compliance with the County Zoning Ordinance and in providing driveway access to buildings on such lots from an approved street. *(Ordinance #89/July 1, 2008)*

- .1 The lot size, width, depth, shape and orientation, and the minimum front yard setback lines shall be appropriate for the location of the subdivision and for the type of development and use contemplated, and shall comply with the minimum standards of the County Zoning Ordinance. *(Ordinance #89/July 1, 2008)*
- .2 Dimensions of corner lots shall be large enough to allow for the erection of buildings, observing the minimum front yard setback from both streets. *(Ordinance #89/July 1, 2008)*
- .3 RESERVED.
- .4 Where lots are more than double the minimum required area for the zoning district, the County Board may require that such lots be arranged so as to allow further subdivision and the opening of future streets where they would be necessary to serve such potential lots, all in compliance with the County Zoning Ordinance and the provisions of this Ordinance. Commission and County Board approval shall be required for any property line adjustment or parcel split which takes place on lots platted after the effective date of this Ordinance. The Commission may require that a resubdivision/replat be prepared in lieu of a property line adjustment or parcel split. *(Ordinance #89/July 1, 2008)*
- .5 Depth and width of lots reserved or laid out for commercial or industrial purposes shall be adequate to provide for off-street parking and loading facilities required for the type of use and development contemplated, as established in the County Zoning Ordinance. *(Ordinance #89/July 1, 2008)*
- .6 Every lot shall abut and have access to a public or private street. *(Ordinance #89/July 1, 2008)*
- .7 In general, side lot lines shall be at right angles to street lines, or radial to curving street lines, unless a variation from this requirement will give a better street or lot layout. *(Ordinance #89/July 1, 2008)*
- .8 Double frontage and reverse frontage lots shall be avoided except where necessary to provides separation of residential development from arterial streets or to overcome specific disadvantages of topography and orientation. *(Ordinance #89/July 1, 2008)*

- 7.01.07 **FRONTAGE REQUIRED:** All major subdivisions shall be in areas in which the property lies immediately adjacent to or has direct access from a hardsurfaced public street. In the event the subdivision is proposed to be developed as a major subdivision, the interior private street shall be developed as stipulated in Section 5.01.11; however, the public street leading to the interior private street shall be a hardsurfaced public street. In the event the proposed subdivision is situated on an existing graveled or oiled public street it shall be the developer's responsibility to have a hardsurfaced public street constructed from the subdivision entrance road(s) or from the subdivision frontage to another hardsurfaced public street. *(Ordinance #89/July 1, 2008)*
- 7.01.08 **STREET LAYOUT AND DESIGN:** The arrangement, character, extent, width, grade and location of all streets shall be designed with consideration of and in relationship to existing and planned streets, topographical conditions, public convenience and safety, and the proposed uses of land to be served by such streets. The layout and design of streets in all subdivisions shall conform to the following: *(Ordinance #89/July 1, 2008)*
- .1 Streets shall provide, where practical, for the continuation or appropriate projection of existing streets in the surrounding area. *(Ordinance #89/July 1, 2008)*
 - .2 Streets shall be related appropriately to the topography. Local streets shall be curved wherever possible to avoid conformity of lot appearance. All streets shall be arranged so as to obtain as many as possible of the building sites at, at or above, the grade of the streets. Grades of streets shall conform as closely as possible to the original topography. A combination of steep grades and curves shall be avoided. *(Ordinance #89/July 1, 2008)*
 - .3 Streets shall be properly related to special traffic generators such as industries, business districts, schools, churches, and shopping centers; to population densities; and to the pattern of existing and proposed uses. *(Ordinance #89/July 1, 2008)*
 - .4 Local streets shall be laid out to conform as much as possible to the topography, to permit efficient drainage and utility systems, and to require the minimum number of streets necessary to provide convenient and safe access of property. *(Ordinance #89/July 1, 2008)*
 - .5 The rigid rectangular gridiron street pattern should be avoided wherever possible and the use of curvilinear streets, cul-de-sacs, or loop streets shall be encouraged where such use will result in a more desirable layout. *(Ordinance #89/July 1, 2008)*
 - .6 Proposed streets shall be extended to the boundary lines of the tract to be subdivided, unless prevented by the topography or other physical conditions, or unless in the opinion of the County Board such extension is not necessary or desirable for the coordination of the layout of the subdivision with the existing layout or the most advantageous future development of adjacent tracts. *(Ordinance #89/July 1, 2008)*
 - .7 In nonresidential subdivisions, the streets and other access-ways shall be planned in connection with the grouping of buildings, location of rail facilities, truck loading and maneuvering areas, walks and parking areas so as to

minimize conflict of movement between the various types of traffic, including pedestrian. *(Ordinance #89/July 1, 2008)*

- 7.01.09 STREET STANDARDS: Street standards including, but not limited to, right-of-way widths, grades, sight distances, vertical curve length, and pavement type, width and thickness, shall be based upon standards equal or greater than current American Association of State Highway and Transportation Officials (AASHTO) standards and current Iowa Department of Transportation specifications pertaining to paving and drainage facilities. Hydraulic design of drainage facilities shall meet or exceed the minimum requirements currently utilized by the County Engineer. *(Ordinance #89/July 1, 2008)*
- .1 Dedication of additional right-of-way shall be required for any subdivision having frontage on an existing street which does not meet with the minimum right-of-way width required by the County Engineer. *(Ordinance #89/July 1, 2008)*
 - .2 All major and minor subdivisions shall meet Minimum Road Standards for Private Subdivisions as defined by Resolution 01-11. *(Ordinance #89/July 1, 2008)*
 - .3 All permanently dead-end streets shall terminate in a cul-de-sac with a minimum of right-of-way diameter of one-hundred (100) feet. *(Ordinance #89/July 1, 2008)*
 - .4 Dead-end streets, designed to be so temporarily, shall extend to the property line. A temporary "T" shaped turnaround shall be provided on all temporary dead-end streets, with the notation on the final plat that the land outside of the normal street right-of-way shall revert to abutting land owners whenever the street is continued. *(Ordinance #89/July 1, 2008)*
 - .5 Guard rails and warning posts shall be placed as required by the County Engineer, along the shoulder of any street where the construction of such street has created a severe embankment. *(Ordinance #89/July 1, 2008)*
 - .6 All concrete pavement shall utilize Type 1 Portland Cement. *(Ordinance #89/July 1, 2008)*
 - .7 All pavements shall meet or exceed minimum smoothness standards based on current Iowa Department of Transportation specifications, as stipulated in Section 2316.02-Measurements; 2316.03-Evaluation; and Section 2532-Pavement Surface Repair (Diamond Grinding). Final profile index shall not exceed twenty (20) inches per mile or the current metric equivalent adopted by the Iowa Department of Transportation. All costs incurred to test for assurance that the minimum smoothness standards have been met shall be the responsibility of the developer. *(Ordinance #89/July 1, 2008)*
 - .8 Bump correction or smoothness correction or both may be required. If required, the correction shall be completed before the final determination of pavement thickness. All bumps exceeding a vertical height of five-tenths (0.5) inch in a twenty-five (25) foot span, as indicated on the profile trace, shall be corrected. Corrections will also be required, in lengths excluded from the profilogram, for deviations exceeding one-eighth (1/8) inch in ten (10) feet. However, on asphalt pavements the surface shall be corrected only with approval of the County Engineer. Also, when an additional full width lane for

through traffic is to be constructed, bump correction of the new pavement will not be required if the bump also occurs at the location in the adjacent lane. The corrected bumps will be considered satisfactory when measurement by the profilograph shows that the bumps are five-tenths (0.5) inch or less in a twenty-five (25) foot span. *(Ordinance #89/July 1, 2008)*

- .9 Streets which exceed eight hundred (800) feet in length shall use a slip form paver when furnishing portland cement concrete. Streets less than eight hundred (800) feet in length may use a slip form paver when furnishing portland cement concrete. *(Ordinance #89/July 1, 2008)*

7.01.10 ACCESS TO ARTERIALS: Where a subdivision borders on or contains an existing or proposed arterial street, the County Board may require that access to such streets be limited by one of the following means: *(Ordinance #89/July 1, 2008)*

- .1 The subdivision of lots so as to back onto the arterial street and front onto a parallel local street. No access shall be provided from the arterial street and screening shall be provided in a strip of land along the rear property line of such lots. *(Ordinance #89/July 1, 2008)*
- .2 A series of cul-de-sac or loop streets, entered from and designed generally at right angles to such parallel street, with the rear lines of their terminal lots backing onto the arterial street. *(Ordinance #89/July 1, 2008)*
- .3 A marginal access street, separated from the arterial street by a buffer or grass strip and having access thereto at suitable points. *(Ordinance #89/July 1, 2008)*
- .4 In a minor subdivision where driveway access is directly from a street, the County Board may require that such lots be served by a combined access driveway in order to limit possible traffic hazard on such street. Where possible, driveways shall be designed and arranged so as to avoid requiring vehicles to back into traffic on arterial streets. *(Ordinance #89/July 1, 2008)*
- .5 No more than four (4) parcels in a subdivision can be directly accessed from an existing street. A cul-de-sac, frontage road or series of interior streets shall be required when the number of lots exceed four (4), unless a residential driveway that existed prior to January 1, 2008 will be utilized and no new entrances are being constructed. *(Ordinance #89/July 1, 2008)*

7.01.11 RAILROADS AND LIMITED ACCESS HIGHWAYS: Railroad right-of-ways and limited access highways where so located as to affect the subdivision of adjoining lands shall be treated as follows: *(Ordinance #89/July 1, 2008)*

- .1 In residential subdivisions, a buffer strip of at least twenty-five (25) feet in depth, in addition to the normal depth of the lot required in the zoning district, shall be provided adjacent to the railroad right-of-way or limited access highway. This strip shall be part of the platted lots and shall be designated on the final plat: "This strip is reserved for screening. The placement of structures hereon is prohibited." *(Ordinance #89/July 1, 2008)*
- .2 In nonresidential subdivisions, the nearest street extending parallel or approximately parallel to the railroad shall, whenever practicable, be at a

sufficient distance therefrom to ensure suitable depth for the commercial or industrial sites. *(Ordinance #89/July 1, 2008)*

- .3 Streets parallel to a railroad or limited access highway when intersecting a street which crosses the railroad or limited access highway at grade shall, to the extent practical, be at a distance of at least one hundred fifty (150) feet from such right-of-way. Such distance shall be determined with consideration of the minimum distance required for further separation of grades by means of appropriate approach gradients. *(Ordinance #89/July 1, 2008)*
