UTILITY PERMIT NO.

Utility permit for telecommunications, electric, gas, water, and sewer.

APPLICANT NAME	
STREET ADDRESS	
CITY	
STATE AND ZIP CODE	
TELEPHONE NUMBER	
CONTACT PERSON EMAIL	

The applicant agrees to the following permit requirements:

- 1. The applicant will file a Location Plan setting out the location of the proposed line on the Secondary Road System. This Location Plan will include a description of the proposed installation.
- 2. The applicant agrees to give the county forty-eight (48) hours notice of its intention to start construction in the County right-of-way.
- 3. Boone County will name a party to inspect the construction operation of the utility company. The utility company agrees to pay the cost of the inspection services.
- 4. The party will inspect for the following items. Any items listed that are found to be deficient by the inspector shall be corrected by the applicant at its expense.
 - a. "<u>Traffic Controls</u>" to comply with current Iowa Department of Transportation (IDOT) standards controls.
 - b. Minimum depth of cover shall be: Telecommunication 36", Electric 48", Gas 48", Water 60", Sewer 60". If the ditch has silted in, add the depth of the silt to the minimum required above.
 - c. Reference markers in the R.O.W. boundary to locate line and changes in alignment. (At least every 1,000 feet)
 - d. All tile line locations will be marked with references located in the R.O.W. line.
 - e. Residents along the utility route will not be without access to the public roads. An all weather access will be maintained for residents adjacent to the project.
 - f. An assessment of the road surfacing will be made both before and after construction. Granular surfacing will be added to the road to restore the road to its original condition. After surfacing has been applied, the road surface will be reviewed after the roadway has been saturated, to determine if

additional surfacing on the roadway is necessary.

- g. All damaged areas within the R.O.W. will be repaired and restored to at least its former condition.
- h. Areas disturbed during construction which present an erosion problem shall be solved by the utility company or the contractor in a manner approved by the County Engineer.
- i. All trenches, excavations, and utilities that are knifed will be properly tamped as approved by the County Engineer.
- j. The vertical clearance of overhead wires shall comply with the applicable National Safety Code.
- k. All utilities constructed on a longitudinal line along the road shall be placed at a location approved by the County Engineer.
- I. The inspector may opt to shut the contractor down if the contractor's work does not meet Boone County's Ordinance.
- m. Road crossings will be bored. The depth below the road surface will match the minimum depth of cover for the respective utility. Exceptions will be a condition of the permit.
- 5. The utility company shall save Boone County harmless of any damages resulting from the applicant's operations. A certificate of insurance shall be required naming Boone County as an Additional Insured for the permitted work. (Limits of Liability \$1,000,000.00)
- 6. The applicant will, at any time subsequent to installation of utility lines at his own expense, relocate or remove his lines as may become necessary to conform to new grades, alignment, or widening of R.OW. resulting from maintenance or construction operations for highway improvements. Maintenance problems shall not be governed by the time restraints of the ONE CALLSYSTEMS.
- 7. Repealed.

DATE

- 8. Exceptions to the required inspection may only be granted by the Boone County Engineer of Boone County, Iowa.
- 9. Inspection required.
